Mapping and measuring project outputs
using the VLG Wimmera Mapping Tool For Landcarers

Use this tool to map and measure:

- Area revegetated (ha)
- Area controlled for weeds (ha)
- Area controlled for rabbits (ha)
- Length of fencing installed (km) and area protected (ha)
- Assessment/survey areas (ha)
- Locations of engagement events
- Locations of nest boxes installed

The VLG Wimmera Mapping Tool For Landcarers supports the creation of polygons (areas), lines (fencelines) and points (locations), allowing you to map and measure a range of project activities/outputs.

1. Open the tool

Go to **https://map3.wcma.work/** and enter your username and password provided by Wimmera CMA.

2. Locate your area

Use the search box in the upper-left corner of the tool to search for a property address, town, road name or location.

OR

You can also move around the map manually by:

- Clicking and holding the left mouse button, then dragging the map.
- Using the + and - buttons on the left side of the map to zoom in and out.
- Using the scroll wheel on your mouse to zoom in and out.

3. Map each project output

- Click **Add object** at the bottom of the screen and select the output you want to map (revegetation, fencing, weed control, rabbit control, assessment, engagement event, nest box, other)
- Left-click on your mouse to draw the feature on the map:

- revegetation, weed control, rabbit control and assessment sites are mapped as polygons and will automatically be measured in hectares for you;
- fencing is mapped as a line and will automatically be measured in kilometres for you;.
- engagement events and nest boxes are mapped as points and do not require measurement.

- Enter a description in the **Note** box, such as the site number or site name used in your funding application.
- Click **Save**.

If your project includes multiple locations, repeat this process for each site.

Use the measurements calculated automatically on your map to help answer the relevant questions about outputs achieved in your Smartygrants form.

4. Share your map

Once all project sites you wish to share have been mapped:

- Click the **Share site** button on the right-hand side of the map.
- Click **Copy** to copy the share link.
- Paste the share link into the "**Link to completed project map**" field in the **Supporting Documents** section of your Smartygrants report form.

Tips

- If you make a mistake while drawing, press **Esc** on your keyboard to cancel the drawing and start again.
- If you need to remove a completed feature, click the red **X** displayed beside the feature.
- You can return to the mapping tool at any time to add additional project sites before submitting your final report.
